50X1-HUM

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1.  the investment plan for East Germany for the seven year plan period 1959-65, as developed by the State Planning Commission. The plan also shows investments for 1958. These investments (Investitionen) represent construction costs, design costs (Projektierungskosten) and purchases which increase plant productive capacity (Anlagevermogen). Excluded are administrative costs, wages and salaries which constitute expendable items (nicht aktiviert werden) quickly used up. The investment funds are derived principally from operating profits (Gewinne des Betriebes) and the remainder comes from the State Budget (Staatshaushalt).
2. Some of the more important aspects of this investment plan are:
 - a. Over the plan period (1959/65) the total volume of investment is more than doubled.
 - b. Investment in coal production is to decrease slightly while investment in other forms of energy more than triples.
 - c. Investment in the production of chemicals is tripled during the period.
 - d. Investment in the East German railroad (Reichsbahn) is to be doubled.
 - e. Central and local government investment in the field of trade and supply (Handel und Versorgung) increases approximately five-fold.
